Note: To protect student privacy, data are suppressed (*) on the Cohort Reports if the cell size within a selected student population (cohort students) is 10 or less. Additionally, on the Ethnicity reports, “Not Reported” is suppressed, regardless of actual cell size, if the student population for one or more other ethnicity groups is suppressed.

Due to the changes in the methodology for calculating the 2016–17 ACGR and subsequent years, the CDE strongly discourages against comparing the 2016–17 ACGR with the cohort outcome data from prior years.

* Charter school data are removed by default from all district-level DataQuest four-year adjusted cohort graduation rate (ACGR) and cohort outcome reports, including the associated state and county Report Totals. To include charter school data in district-level reports, select the “Reset Filters” button on district-level reports to show data for “All Schools” OR select the desired School Type filter from within the expandable Report Filters menu on the desired DataQuest report.

** Results produced using the Alternative School report filter on the DataQuest four-year adjusted cohort graduation rate (ACGR) and cohort outcome reports will NOT provide the same results or information on the graduation rates of schools approved with a Dashboard Alternative School Status (DASS). While DataQuest reports the four-year ACGR for DASS schools, the Dashboard reports a one-year graduation rate for these schools. The Alternative School filter is strictly intended to facilitate comparisons of the four-year ACGR within the DataQuest reports, which do not include any “one-year” rates for DASS schools.
